

Real-time synergies between tourism and mining: the way & beyond

Werner Ewald – November 2011

www.eesy-ees.com

Mining & Tourism – building synergies for sustainable development (13 May 2011, Alte Brücke)

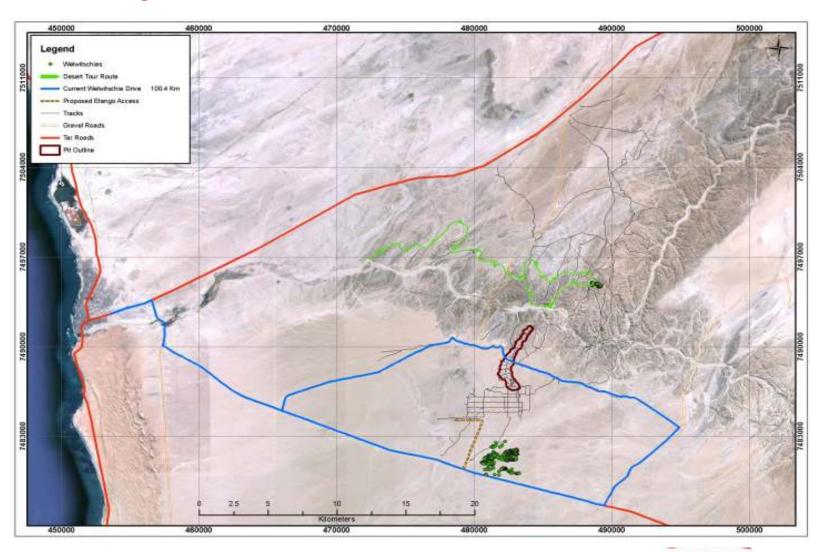

Six projects identified:

- 1. Re-inventing the Welwitschia Drive identifying alternatives
- 2. Re-vamping / re-location of some of the moon landscape viewpoints
- 3. Developing sites around WW1 monuments (Namib Heritage Project)
- 4. Possible creation of hiking trails & camp sites in the Swakop River Valley
- 5. Identifying and promoting cultural and tourism sites in the Kuiseb River Valley
- 6. Spitzkoppe communal tourism promotion

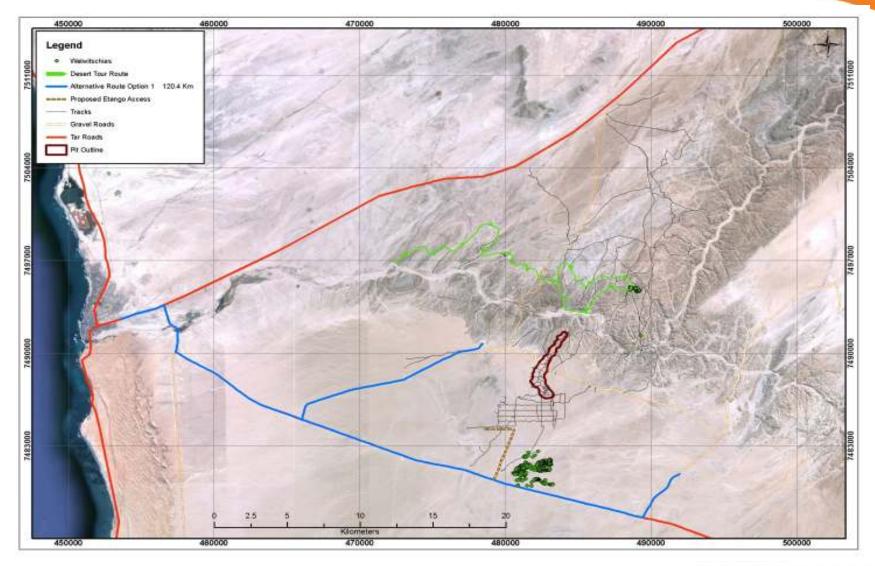

Project 1:

Re-inventing the Welwitschia Drive – alternative routes

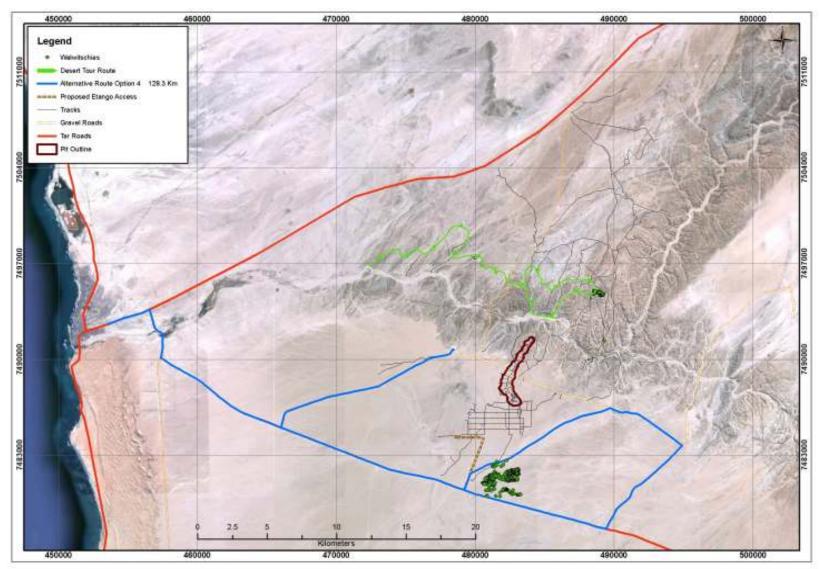

Alternative 1 (cost ~ N\$ 0)

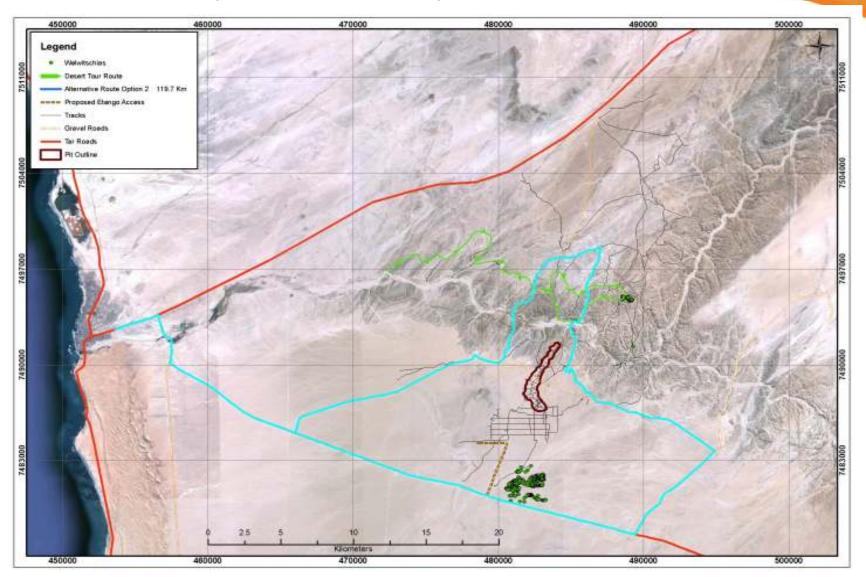

Alternative 2 (cost ~ N\$ 1.5m)

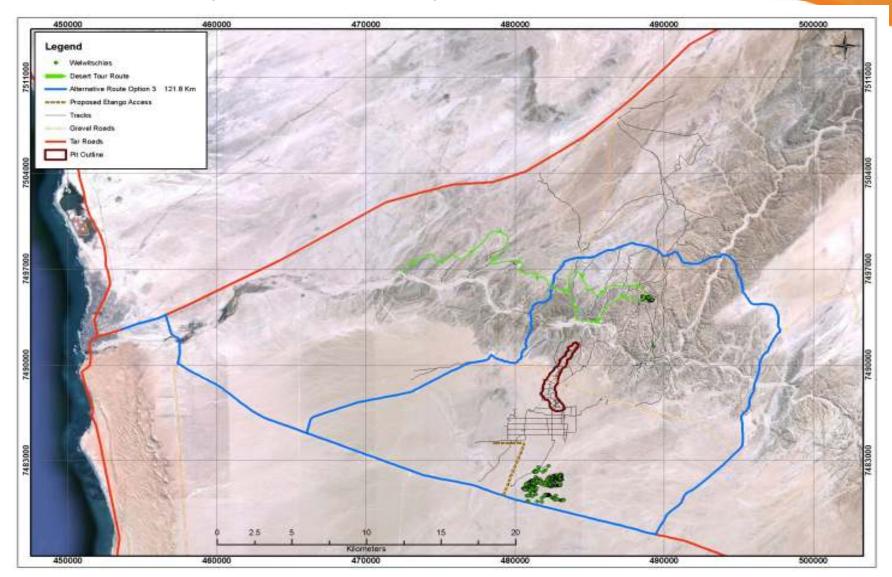

Alternative 3 (cost ~ N\$ 2.5m)

Alternative 4 (cost ~ N\$ 3.5m)

Project 2: Re-vamping / re-location of some of the moon landscape viewpoints

Some real - time working together!

Stakeholders working together making a difference

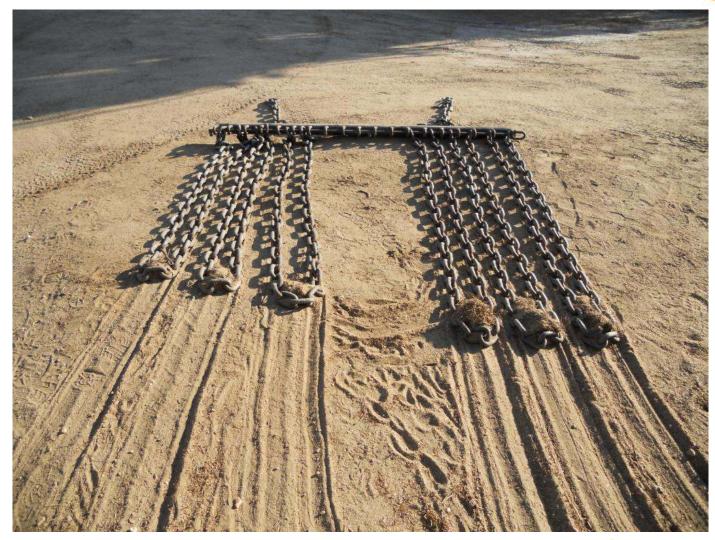

Project 3:The Namib Heritage Project

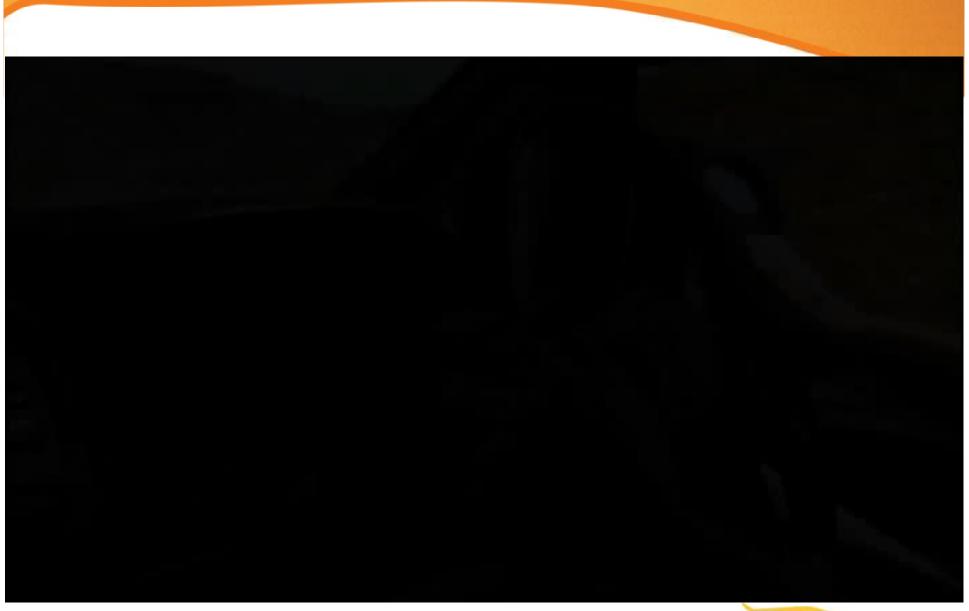

The real-time 'Corru-buster' way

Synergies

- 1. It takes time and energy to understanding each other's needs
- 2. Having the courage to make each other aware of opportunities
- 3. Is it easy? NO; it is hard work, but it is rewarding!
- 4. Synergies create more opportunities
- 5. Working along side each other

The way & beyond

- Can Namibia really make this work? I believe that we can the Namibian way is to not just talk about the problem, but to find a solution
- 2. Opportunities exist for adventure tourism; simulators; etc
